

Ball Valves

Bi-Flow Ball Valves

Customer Value Proposition:

Parker Bi-Flow Ball Valves are available in a range of Inch Sizes from 1/4" to 4.1/8", metric from 6-108 mm but also in Schraeder valve version.

Cap:

Brass cap thread broached in three places to ensure adequate venting when the cap is removed. The cap is also tagged to accommodate wiring and sealing where legislation demands.

Ball features:

A small hole in one sealing face of the ball prevents refrigerant being locked within the ball when closed. It also allows the ball to exert a greater force against the Teflon Ball seal when closed, giving greater close-off security.

Product Family:

- Ball valves

Applications:

- Supermarkets
- Refrigeration
- Chiller

Advantages:

- Compact
- Reliable
- Vented cap
- Long life
- Complete range from 1/4" to 4.1/8"
- Metric from 6 mm to 108 mm
 - 100 % controlled for leakages
 - Sealing of valve stem is ensured by 3 seals and a PTFE gasket on the cap
 - High temperature of use

ENGINEERING YOUR SUCCESS.

Nomenclature

O. D. = Outside Diameter

OBV6MM = Ball valve for O.D. tube 6 mm

BV21SV = Ball valve for O.D. tube 2 1/8 inches, so 2" 5/8 OD with Schrader Valve (SV)

Working Range

PS: 45 bar

TS: -40°C to +150°C

Refrigerant Compatibility

Compatible for use with all HFC and HCFC refrigerants.

Ball valves could also be equipped with Schrader valves.

For more information on CO₂, please contact us.
